

March 21, 1975

TO WHOM IT MAY CONCERN

This is to record that I have very happily sponsored a period of study on the part of Robert Waldinger for the month of January, 1975. One of the products of his work during that time is a paper entitled "perspectives on Nazi Racism: American Geneticists and Anthropologists, 1933-1945". I have had many discussions with Mr. Waldinger and have carefully read his paper and believe, unequivocally, that it deserves the highest possible academic grade.

Sincerely yours,

Joshua Lederberg  
Chairman and Professor  
Department of Genetics
